COLORTRAC
Release Notes

JANUARY 2018

* SmartLF Scan!NetApp v2.3.4j *

FIRST VERSION - MANUAL UNINSTALL REQUIRED

A change to a new installer means that for this first version only, the uninstall of the previous NetApp cannot be made to happen automatically as part of the new install. Instead it must be carried out manually - see below.

To uninstall the previous version of NetApp go to Control Panel, look for Scan NetApp 2.2.3 (or earlier) then click un-install. Once the old version has uninstalled you can go ahead and install this version.

Additions:

None

Fixes:

PDF corruption when changing modes

JPEG and NetApp compression rates aligned Scan transferred banner re-instated

PDF files open automatically on pc
Known issues:
Windows10 Start Menu entries not working Note(s):

COLORTRAC
Release Notes

APRIL

2016

* SmartLF Scan!NetApp v2.0.0 *

Migration to new environment as preparation for new features (not released)

COLORTRAC
Release Notes

NOVEMBER 2015

* SmartLF Scan!NetApp v0.16 *

Fixes:

* system tray message is 'Scan received' after scan file is stored at the computer

This software when installed on a Windows computer connected to the same network as Scan! allows the scanner to locate the computer and send live scans or transfer stored scans to that computer.

Known issues:

Useful notes:

If scanner fails to reconnect after a reboot or being away from its normal network uncheck the scanner lock button and re-establish the connection before re-checking the lock.

COLORTRAC
Release Notes
